Research Project Supported by Competitive Research Funding 2015

General Category

- Principal Investigator: Rockell Kim Forrester Title: Interactive Composition to Support Japanese Learners' L2 Development Amount: ¥ 100,000
- Principal Investigator: Jung-pil Shin Title: Human Computer Interaction on Pen Computing Amount: ¥ 520,000
- 3. Principal Investigator: Debopriyo Roy Title: Physical LEGO Design for Robots and 3D Printing in Creative Factory Contexts for English Language Learning Amount: ¥ 100,000
- 4. Principal Investigator: Kenta Ofuji Title: Statistical analysis of linguistic characteristics in evacuation calls Amount: ¥ 100,000
- 5. Principal Investigator: Junji Kitamichi Title: Formal approach for system fault analysis of embedded systems Amount: ¥ 349,000
- 6. Principal Investigator: Mohamed Hamada Title: Learning Style Index :a Phase for Smart Multimedia Learning Framework Amount: ¥ 169,000
- 7. Principal Investigator: Yan Pei Title: Linear and generalized principal component discriminant analysis: study on establishment analytical framework fundamental of data projection approaches Amount: ¥ 265,000

- Principal Investigator: Hiroshi Saito Title: Development of System-level Design Environment for FPGA-based Systems Amount: ¥ 865,000
- 9. Principal Investigator: Ben A. Abderazek Title: Photonic 3D-Network-on-Chipfor High-throughput Many-core Systemon-Chip Amount: ¥ 1,305,000
- Principal Investigator: Neil Y. Yen Title: Human-centric Decision-making Support for Natural Disaster Recovery Support Amount: ¥ 385,000
- 11. Principal Investigator: Shigeyuki Aoki
 Title: Revision of Toulmin's Model of Argument through the construction of argument database
 Amount: ¥ 213,000
- Principal Investigator: Ryoji Sawa Title: Stochastic Equilibrium Selection with Behavioral Players Amount: ¥ 684,000
- Principal Investigator: Wenxi Chen Title: Development of an Automatic Monitoring System for Bathtub Electrocardiogram Amount: ¥ 827,000
- 14. Principal Investigator: Lei Jing Title: R & D on wearable engine design and basic functional modules Amount: \clubsuit 494,000
- Principal Investigator: Moonyoung Park Title: Enhancing Mobile-Assisted Language Learning (MALL) through Usability Testing and Curriculum Innovation Amount: ¥ 116,000

- 16. Principal Investigator: Anh T. Pham Title: Integrated FSO/PON for Next-Generation Access Networks: Cross-Layer Designs and Enabling Technologies Amount: ¥ 1,012,000
- 17. Principal Investigator: Song Guo Title: Robot-assisted deployment and maintenance of wireless sensor networks Amount: ¥ 1,373,000
- Principal Investigator: Hitoshi Oi Title: Power-Efficient System Design with Multi-core Processors Amount: ¥ 100,000
- Principal Investigator: Yoichi Tomioka Title: Power-Efficient Human Detection and Privacy Protection Hardware For Drones Amount: ¥ 938,000
- 20. Principal Investigator: Younghyon Heo Title: Developing a corpus of useful English vocabulary and sentence structures for Japanese computer science majors learning academic writing Amount: ¥ 376,000
- 21. Principal Investigator: Julian Villegas Title: My city-Your city. A benchmarking platform for environment indicators Amount: ¥ 228,000
- 22. Principal Investigator: Shigeo Takahashi Title: Visual Analytics of Multivariate Data via Mathematical Fibers: Application to Spatiotemporal Topographic Analysis of Radiation Level Amount: Υ 1,210,000
- 23. Principal Investigator: Takako Yasuta Title: Comics for L2 Paragraph Writing: How visuals can help EFL learners to understand paragraph structures Amount: ¥ 132,000

- 24. Principal Investigator: Nobuyoshi Asai
 Title: A robust Server construction of Hyper English Dictionary with Etymology
 Amount: ¥ 100,000
- 25. Principal Investigator: Peng Li
 Title: Prolong Usage Time of Smartphones in Disaster Environment
 Amount: ¥ 948,000
- 26. Principal Investigator: Irina Khmyrova Title: Modeling and analytical study of light-emitting diodes with designed electrode(continued) Amount: ¥ 404,000
- 27. Principal Investigator: Saji N. Hameed Title: Applying computer and computational sciences to describe and analyze real-world environmental issues Amount: ¥ 820,000
- 28. Principal Investigator: Cong Thang Truong Title: Quality-enabled adaptation for video streaming over mobile networks Amount: Υ 712,000
- 29. Principal Investigator: Akihito Nakamura Title: Knowledge-Based Semi-Automation of Computer Security Management Amount: ¥ 554,000
- 30. Principal Investigator: Maxim Ryzhii Title: Study of nonlinear cardiac electrical dynamics with heterogeneous oscillator model Amount: ¥ 172,000
- 31. Principal Investigator: Ken Nakazawa Title: Physical education program for SGU Amount: Υ 141,000

- 32. Principal Investigator: Emiko Kaneko Title: Enhancing Unique Features of UoA Short-term Study-abroad Programs Amount: ¥ 785,000
- 33. Principal Investigator: Vitaly KlyuevTitle: Emotion Detection in the Micro blogosphereAmount: ¥ 100,000
- 34. Principal Investigator: Yukihide Kohira Title: Power Consumption Reduction for General-Synchronous Circuits in FPGA Amount: ¥ 694,000
- 35. Principal Investigator: Tatsuki Kawaguchi Title: Project Based Learning as a Pedagogical Strategy for Developing Skills in Glocal Collaboration in Aizu and World Amount: ¥ 384,000
- 36. Principal Investigator: Ian Wilson
 Title: Differences between Japanese and English underlying articulatory setting
 Amount: ¥ 335,000
- 37. Principal Investigator: Yuichi Yaguchi Title: Flip Education Support System using Moodle Amount: ¥ 475,000
- 38. Principal Investigator: Yutaka Watanobe Title: Integration of Software Components based on Service Oriented Architecture for Research and Education Amount: ¥ 1,029,000
- 39. Principal Investigator: John Brine Title: A System for Awarding Points in the Digital Badges English-village Amount: ¥ 226,000

Mid-Term Category

- 1. Principal Investigator: Incheon Paik Title: Workflow Generation for Automating Process of Big Data Analytics using Service Composition Amount: $\cong 1,132,000$
- Principal Investigator: Igor Lubashevskiy Title: Emergent Mechanism of Categorization by Humans under Uncertainty: Experiments and Modeling of Psychophysiological Processes Amount: ¥ 700,000
- 3. Principal Investigator: Subhash Bhalla Title: Relational Database Query Languages for Large Scale Medical Information Repositories over Cloud-based Databases Amount: ¥ 559,000

UBIC Category

- 1. Principal Investigator: Qiangfu Zhao Title: Daily activity recognition based on a sparse infrared sensor array Amount: ¥ 1,252,000
- 2. Principal Investigator: Toshiaki Miyazaki Demand Addressable Sensor Network (3rd year) Amount: ¥ 1,724,000
- 3. Principal Investigator: Michael Cohen "Mobile Ambient,"
practically panoramic" whole-body entertainment Amount:
 ¥754,000

CAIST Category

1. Principal Investigator: Hirohide Demura Title: Development of fundamental technologies for lunar and planetary ex-

plorations Amount: ¥ 1,906,000

- Principal Investigator: Kyoko Okudaira Title: Development of initial analysis system for JAXA Tanpopo mission aerogel samples retrieved form the International Space Station Amount: ¥ 523,000
- 3. Principal Investigator: Xin Zhu Title: Study on sudden cardiac death: mechanism, prediction, monitoring and therapy Amount: $\cong 2,329,000$
- Principal Investigator: Keitaro Naruse Title: Development of RT middleware based almost unmanned robot weeding system in large-scale rice fields Amount: ¥ 2,344,000
- 5. Principal Investigator: Takafumi Hayashi Title: Could supporting Cyber Physical System Integration using Message Networking Amount: ¥ 1,520,000
- 6. Principal Investigator: Nohito Nakasato Title: Co-design of parallel architectures and parallel applications Amount: ¥ 2,265,000
